**DETAILED ACTION**

1. This application has been examined.
2. The RCE and amendment filed 3/16/09 have been entered.
3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 99-106 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. These claims are directed to a tangible machine readable medium, which is still not deemed statutory subject matter.

5. Claims 48-82 and 107-114 are allowable over the prior art of record. The additional features brought out in the amendment, including causing the graphical user interface to display each additional calendar event marked with a graphical indicator corresponding to the wireless device from which the calendar event was received, and to display each calendar event and each private calendar event marked with a graphical indicator corresponding to the first wireless device, as well as the new claims with new features brought out in the amendment, are not set forth in the prior art of record.

6. Applicant's arguments filed have been fully considered but they are not persuasive. The remedy for the 101 rejection should be to amend the claims to read "machine readable *storage* medium". Applicant's representative may contact examiner if further guidance is requested.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven P. Sax whose telephone number is (571) 272-4072. The examiner can normally be reached on Monday thru Friday, 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Hong can be reached on (571) 272-4124. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
